On Tuesday, July 07, 2020, SSI will be performing planned maintenance in our Production environment between 6am and 8am Pacific Time.

This release of CareAlign, 3.6.7.1.1 will address the following list and will only impact the CareAlign portal and not CareExchange (XDS, XCA, XDR).

This update will address the following issues:

Enhanced Functionality:

*	Refinements to patient matching

*	Direct Messages that are new will be marked as "Unread"

SacValley does not require any action from our members. We will send out further notifications to everyone as to any other specifics that need to be communicated
